

Found-Object Color Wheel

One of the fun and successful lessons that quickly circulated online during quaranteaching was the found-object color wheel, adaptable for any grade level. The challenge was to make and photograph a color wheel from objects found around the home. Here are some examples shared by teachers from their students. Interestingly enough, this would have been difficult to do at school!

Clockwise from top-left: Olivia K., student of Amanda Youngblood. Student of Elaine Buckley. Mary Scott T., student of Amanda Youngblood. Braxton W., student of Amanda Youngblood. Student of Lauren Nielsen. Student of Elaine Buckley.
