# Davis Digital: **Portfolios**

Davis Digital is an online learning environment designed for flexibility. The portfolio feature included with the platform offers teachers and students a place to collaborate and showcase work done individually or as a class. Portfolios can be accessed anytime from any device with access to an internet connection.

With Davis Digital Portfolios you can:

- Easily create custom online galleries.

- Offer students a place to post their artwork for display, to show project progress, or present artwork for critique.

- Share student artwork and important information about your art program with students, colleagues, supervisors, parents, and community members.

- Extend learning by easily adding links to videos, galleries, websites, and other lesson resources.

- Update students and parents about upcoming special events and project due dates.

Portfolios are accessed through the Davis Digital homepage.

Visit **DavisArt.com/Sample** to try out the Portfolios.
